

Aditya Tripathi

Data Science Student | Project & Web Developer | AI & Hackathon Passionate

✉ aditya.tripathi.tech@gmail.com | ☎ +91 9354910182 | 📍 Noida, India

🔗 [GitHub](#) | [LinkedIn](#)

Computer Science student specializing in Data Science, with hands-on experience in Python, Java, and full-stack web development. Passionate about AI, backend engineering, and IoT. Demonstrated through multiple hackathon participations, certifications from premier institutions (IIT Bombay, IIT Roorkee), and real-world projects. Seeking opportunities to contribute to impactful technology products while continuously growing as an engineer.

EDUCATION

B.Tech — Computer Science & Engineering

2024 – 2028

Maharishi University of Information Technology, Noida

- Coursework: Data Structures, Algorithms, Database Management Systems, Web Technologies
- Actively participating in hackathons and building AI/IoT projects alongside studies

Online Courses & Training

2024 – 2028

UpGrad — Virtual/On-Campus Noida

- MUIT AIML – 2024 Batch: AI & Machine Learning fundamentals (Jul 2025)
- Java Programming: Core Java, OOP, and GUI application development (Aug 2024 – Present)
- Python Programming: Data handling, scripting, and automation (Jan 2026 – Present)
- Database Management System: SQL, relational databases, and data modeling (Jul – Dec 2025)

WORK EXPERIENCE

Campus Ambassador

Dec 2025 – Feb 2026

eDC IIT Delhi · Virtual Internship

- Represented and promoted EdC IIT Delhi initiatives across campus, driving student engagement
- Collaborated with a national network of ambassadors to organize events and disseminate technical opportunities

PROJECTS

LifeFlow — Smart Blood Donation & Emergency Connectivity Platform

Feb 2025 – Mar 2025

A technology-driven platform bridging the gap between blood donors and patients in emergencies. Implemented location-based matching to enable fast, reliable blood donation assistance. Built with real-time connectivity features to reduce response time in life-critical situations.

MNEMO — Living Knowledge Engine

Feb 2026 – Present

Real-time AI pipeline built on the Pathway framework (Python's post-transformer streaming model). Keeps a vector index automatically synchronized inside the pipeline with all data sources, ensuring every query retrieves the most up-to-date knowledge. Designed for scalable, always-fresh retrieval-augmented generation (RAG).

Mesh Communication Device

Feb 2026 – Present

Designing an off-grid communication device using LoRa (Long Range) wireless technology to enable mesh networking without internet infrastructure. Targeting disaster-relief and remote-area communication scenarios.

Additional Projects: AI Assistant (hackathon) · Java Employee Management System (GUI) · AI + Blockchain Solution

TECHNICAL SKILLS

- Python
- Java
- JavaScript (HTML/CSS)
- React.js
- La-Tex Editor
- Web Application Development(React)
- Database Management (SQL)
- AI / Machine Learning Concepts
- IoT & LoRa Technology
- Research & Data Analytics
- Web Designing(Figma/WordPress)
- Team Management & Leadership

CERTIFICATIONS & TRAINING

Python Programming	UpGrad, Noida	Jan 2026 – Present
Database Management System	UpGrad, Noida	Jul – Dec 2025
Java Programming	UpGrad, Noida	Aug 2024 – Present
React (Self-Study)	Virtual	May 2025 – Present
Web Application Development	YouTube / Virtual	Sep 2024 – Mar 2025

EXTRACURRICULAR ACTIVITIES

- Participated in multiple hackathons — developed an AI-powered legal assistant and a crowdsourced blood donation platform; worked on AI + API integrations
- Explored IoT concepts through hands-on work with LoRa mesh networking devices
- Built Java GUI applications and full-stack web projects for learning and competitive showcases
